Career Objective

Enthusiastic Electrical Engineer with a passion for designing and optimizing electrical systems. Seeking to contribute technical expertise and innovative solutions to support sustainable and efficient infrastructure.

Education

Master of Electrical Engineering, University of Sydney, Australia (2025)
Bachelor of Science in Electrical Engineering, Ahsanullah University of Science and Technology, Bangladesh (2022)

Technical Skills

- Electrical Design Software: AutoCAD Electrical, ETAP, MATLAB
- Power Systems, Circuit Design, and Control Systems
- Renewable Energy Systems and PLC Programming
- Knowledge of Australian Electrical Standards and Codes

Professional Experience

Electrical Engineer Intern – XYZ Engineering Services, Sydney (2024 – Present)

- Assisted in the design of low- and high-voltage electrical systems for commercial buildings.
- Conducted testing, troubleshooting, and commissioning of electrical installations.
- Prepared technical drawings and documentation to ensure compliance with standards.

Projects

Solar Power System Design – Designed a 50 kW solar PV system for a community centre.
Smart Grid Control System – Developed a control system to optimise power distribution using IoT sensors.

Certifications

Certified Electrical Safety Professional (2024)
